DELIVERABLE 2.5

“Address Book of Energy Supplier Reference Group”

Dr. Robert Steinberger-Wilckens
Sören Christian Trümper
PLANET GbR, Oldenburg, Germany

Document Number: R2H2003PU

Date: 23 May 2007

The European Commission is supporting the Coordination Action “HyLights” and the Integrated Project “Roads2HyCom” in the field of Hydrogen and Fuel Cells. The two projects support the Commission in the monitoring and coordination of ongoing activities of the HFP, and provide input to the HFP for the planning and preparation of future research and demonstration activities within an integrated EU strategy.

The two projects are complementary and are working in close coordination. HyLights focuses on the preparation of the large scale demonstration for transport applications, while Roads2HyCom focuses on identifying opportunities for research activities relative to the needs of industrial stakeholders and Hydrogen Communities that could contribute to the early adoption of hydrogen as a universal energy vector.

Further information on the projects and their partners is available on the project web-sites www.roads2hy.com and www.hylights.org

DELIVERABLE 2.5

ADDRESS BOOK OF ENERGY SUPPLIER REFERENCE GROUP

TABLE OF CONTENTS

1.	Introduction	5
2.	H₂-Players	7
3.	Global Players	31
4.	Index (sorted by name).....	57
5.	Index (sorted by country).....	59
6.	All other “Players“	61

1. Introduction

The Roads2HyCom project consists of a diverse consortium of 29 organisations from fields related to hydrogen and fuel cells. Despite the benefits of this diversity, it is felt necessary to have a robust mechanism of external peer review for work produced by the project. Each major element of work uses one of the following approaches:

- Peer review by a relevant working group(s) of the Hydrogen and Fuel Cell Technology Platform
- Peer review by the public and any interested party, via the Roads2HyCom website
- Peer review by a selected reference group

In the case of Workpackage 2, it was decided to create a reference group. In order to identify suitable members for this Energy Supplier Reference Group (ESRG), this addressbook was compiled as an overview.

It contains three main sections:

H₂-Players : these are companies with previous experience in the field of hydrogen. They should be able to directly comment on any output of Workpackage 2 and many other Roads2HyCom aspects with their expertise in H₂/FC issues and technologies.

Global Players: these are companies with no previous experience in the field of hydrogen, but influence on the market due to size and turnover. They will have a specific knowledge of the energy market, how new technologies can enter this market, how new markets may evolve, and what are the interactions in this large and complex field of business.

Other Players: this is a comprehensive overview of all European energy utilities, sorted by country. It complements this addressbook and helps hydrogen project proposers to find utilities near to their location for help, advice, or co-operation.

Formal registration with the Energy Supplier Reference Group is indicated by an asterisk*

2. H₂-Players

These are companies with previous experience in the field of hydrogen

(formal registration with the ESRG is indicated by an asterisk)*

Agip

Branch: Mineral Oil
Country: Italy

Department:

Company Address: Eni S.p.A.
Piazzale Mattei, 1
00144 Roma
Italy
